

110 mm

IMPORTANT!

DO NOT BREAK YOUR SPEAKER!

Use the attached Voltage Detector Device (VDD) to check your voltage connection.

IF LED is **GREEN**, the voltage is OK. Remove VDD & connect your speaker wire to the 12V power source.

IF LED is **RED**, do **NOT** connect your audio device.
Converter is required.

- **IF** Soundbar, install 12V, 10A converter.
- **IF** Subwoofer, install 12V, 30A converter.
- **IF** Soundbar + Subwoofer, 12V, 40A converter.
- **IF** x2 Soundbar + Subwoofer, 12V 50A converter.

OR consult with your local dealer / installer.
